

PRESS RELEASE

NEW PLASTICS RECYCLING DIRECTORY AVAILABLE NOW !

For immediate release

EuPR, the European Plastics Recycling association has just released an updated version of its directory of European plastics Recyclers.

This new comprehensive directory lists more than 700 plastics recycling companies within Europe listed in alphabetical order by country.

The update takes into account recent changes in the industry of plastics recycling as being revealed at the occasion of a survey on plastics waste management conducted in the first half of 2004. About 750 recycling companies released information on the volumes which were treated in 2003 and the problems their industry encountered over that period of time. This study was conducted in cooperation with PlasticsEurope.

The outcome of the survey gives a detailed view on the developments in mechanical recycling of plastics packaging and non-packaging waste. It also outlines the consequences of national and EU legislation such as the influence of the EU landfill Directive and the waste export to China and India.

The updated Recycling Directory is available for €250,- (excl. VAT)
For more information on the study, please contact:
